

PROTEKTIV

SMOOTH AS GLASS, TOUGH AS NAILS

THE WORLD'S MOST ADVANCED
VEHICLE PROTECTION SYSTEM DESIGNED FOR CARS

INTRODUCING **PROTEKTIV**

The world's most advanced paint protection system designed specifically for automotive use.

PROTEKTIV paint surface coating is so outstanding that it's been certified to meet the Boeing D6-17487 specification. This means it's been tested, proven and certified to the stringent standards set out for Boeing compatible products.

PROTEKTIV paint surface coating is also available to purchase alongside a superior range of interior products.

PAINT SURFACE COATING BENEFITS

- Abrasion resistant properties
- Helps prevent permanent damage caused by water marks and sunscreen
- Revolutionary high gloss finish
- Resists extremely high temperatures
- Reduces vehicle maintenance
- Keeps your vehicle cleaner for longer
- Protects against damage caused by common environmental contaminants
- UV inhibitors prevent UV induced discolouration and fading
- Professionally applied
- National lifetime warranty*

*Terms, conditions and exclusions apply.

HOW IT WORKS

PROTEKTIV is manufactured using nano particles and silica dioxide, the same material that's used in the glass manufacture process. When applied to your vehicle's exterior surface, it results in a highly reflective and transparent protective layer that offers incredible durability and a reflective rich gloss shine.

PROTEKTIV ingredients then form a precise and uniform layer, giving excellent water and oil repellence, helping prevent stains on the vehicle's paintwork. Once applied, PROTEKTIV develops a strong chemical bond, cross linking during the curing process. This offers excellent durability, with an incredible level of gloss and reflectivity.

Brilliant Mirror Finish

It's PROTEKTIV's advanced chemical engineering that provides your vehicle with the purest shine, taking 7 days to cure. PROTEKTIV contains ceramic silica, the same compound used to create crystal glassware.

INTERIOR PRODUCTS

Protektiv includes a range of interior products designed to help maintain the condition of your vehicle. All products are a once off application with no inspections, plus they all come with a national lifetime warranty*.

PROTEKTIV LEATHER COATING

- Deep down moisturising protection
- Contains high quality lanolin ingredients
- Helps to prevent UV induced discolouration, fading and cracking
- Prevent permanent staining of the treated surface caused by sunscreen and make-up
- Prevent permanent staining of the treated surface from water, coffee, soda, milk and other commonly consumed food & liquids
- Scientifically designed for leather

PROTEKTIV FABRIC & CARPET COATING

- Resilient and effective stain barrier against commonly consumed food and liquids
- Provides protection against surface discolouration caused by UV damage
- The coating surrounds the individual fibres helping to create a protective barrier
- Contains a powerful antibacterial system - BactiShield, this remarkable product will help protect your vehicle's fabric against harmful bacteria, moulds and fungus

PROTEKTIV VINYL COATING

- Protects against cracking and discolouration caused by UV damage
- Purpose built for vinyl surfaces
- Provides an easy to clean surface
- Prevent permanent staining of the treated surface caused by sunscreen and make-up
- Prevent permanent staining of the treated surface from water, coffee, soda, milk and other commonly consumed food & liquids

*Warranty terms, conditions and exclusions apply.
