

A highly technical non-metallised film that's specifically designed to provide zero interference to in-vehicle electronics.

This is invaluable in today's world where in every walk of life, smartphones, tracking and navigational devices are part and parcel of the way we live. [Choosing Protektiv Zero will not only help to avoid interference](#), but also provide you and your passengers with a lifetime of driving pleasure, combined with protection from excessive heat, glare and harmful UV rays.

Features

- Extremely tough durable surface with patented scratch resistant coating
- Low light reflectance gives great optical clarity, uninterrupted viewing - night and day
- Helps prevent Electromagnetic Interference (EMI) and Radio-frequency Interference (RFI)
- Patented manufacturing process permanently embeds the colour into the polyester using hydrocarbons and organic substrates
- Multiple layers of UV absorbers help ensure fade resistance
- Simply a great looking window tint
- Lifetime Nationwide Warranty*

Zero interference film helps you stay connected with all your devices without all that irritating urban interference.

Protektiv Zero is specifically designed for zero interference to the signals from electronic devices such as mobile phones, tablets, sat nav, keyless entry and AM/FM and digital radio stations.

Benefits

0%

ZERO INTERFERENCE

Providing full coverage for use with all in-vehicle electronics such as GPS/bluetooth.

34%

SOLAR REJECTED

The total amount of solar energy blocked from entering your vehicle.

50%

HEAT REJECTION

The amount of heat stopped passing through automotive glass.

60%

GLARE REDUCED

Blocks up to 60% glare, helping reduce eye strain and fatigue.

99%

UV REJECTION

The percentage of harmful UV rays blocked from passing through the windows.

6%

LOW REFLECTION

Low light reflectance gives clear uninterrupted visibility day and night.
