

HYDRO^{G9+}

HEAVY HITTING PROTECTION

NEW FORMULA CERAMIC PAINT PROTECTION **WITH GRAPHENE.**
NOW TOUGHER THAN EVER.

EXTREME HARDNESS & RESISTANCE

HYDRO^{G9+} with graphene, now delivers increased abrasion resistance which means the coating is not broken down by weathering, dirt and road grime. Stronger bonding, hardness, and outstanding durability, **HYDRO^{G9+}** with graphene outperforms and outlasts most other paint protection products.

EXCEPTIONAL THERMAL PROPERTIES

HYDRO^{G9+} thermal (heat) properties are found to be approximately double that of conventional ceramic coatings, resulting in exceptional durability and protection for your vehicle's paintwork.

SMOOTHER & BRIGHTER THAN EVER

HYDRO^{G9+} covalent bonding to the vehicle paintwork delivers a surface that is smoother and significantly brighter.

A NEW HYDROPHOBIC INTELLIGENCE

HYDRO^{G9+} with graphene delivers super hydrophobic properties creating an easy-clean low maintenance surface. Engineered with nanotechnology to produce distinctive beading which rolls off the surface helping take away dirt, dust & road grime.

EXTERIOR PROTECTION

WHEN YOU NEED IT MOST

HYDRO^{G9+} surface coating is formulated using graphene, an extremely pure material, thanks to its simple structure based on tight, consistent, atomic bonding.

HYDRO^{G9+} delivers exceptional levels of hardness which translates to increased resistance to the elements and UV stability offering greater defence against fading and oxidation of clear and base coats. This newly formulated surface coating bonds deeper into the vehicle's paintwork, is noticeably smoother to the touch and optically brighter. Backed by a limited lifetime warranty.*

INTERIOR PROTECTION

ADVANCED HYDROPHOBIC FORMULA

HYDRO^{G9+} interior product range includes newly formulated protective coatings for leather, vinyl, plastics and fabric & carpet.
