

SECTION 1 – STATEMENT OF CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

| | | | |
|--------------------------------|---|-----------------------|------------------|
| SUPPLIER: | MotorOne Group Pty Ltd | | |
| ADDRESS: | Level 9, 3 Nexus Court, Mulgrave, VIC, 3170 Australia | | |
| Trade Name: | AUTOTECH WD SPRAY AEROSOL | | |
| TELEPHONE: | 03 8761 1900 | FAX: | NA |
| AH EMERGENCY TELEPHONE: | 1300 774 575 in Australia (M-F 7am-7pm) | Synonym: | 90920028 |
| Substance: | Aerosol spray | Product Use: | Water displacer. |
| Creation Date: | June 2023 | Revision Date: | June 2028 |

SECTION 2 – HAZARDS IDENTIFICATION

Classification of the substance or mixture

| | |
|---------------------------|---|
| Dangerous Goods | Classified as Dangerous Goods by the criteria of the "Australian Code for the Transport of Dangerous Goods by Road & Rail". |
| GHS Classification | Aspiration Hazard: Category 1 Carcinogenicity: Category 1B Aerosol: Category 1 Germ Cell Mutagenicity: Category 1B STOT Repeated Exposure: Category 1 |
| Poisons Schedule | This product is not classified as a Poison according to the SUSMP. |

Label elements

| | |
|-----------------------------|---|
| GHS label pictograms |  |
|-----------------------------|---|

Signal word DANGER

Hazard statement(s)

| | |
|-------------|--|
| H222 | Extremely flammable aerosol. |
| H304 | May be fatal if swallowed and enters airways. |
| H340 | May cause genetic defects. |
| H350 | May cause cancer. |
| H372 | Causes damage to organs (central nervous system) through prolonged or repeated exposure. |

Precautionary statement(s): General

| | |
|-------------|---|
| P102 | Keep out of reach of children. |
| P103 | Read carefully and follow all instructions. |

Precautionary statement(s): Prevention

| | |
|-------------|---|
| P201 | Obtain special instructions before use. |
| P202 | Do not handle until all safety precautions have been read and understood. |
| P210 | Keep away from heat and sparks. - No smoking. |
| P211 | Do not spray on an open flame or other ignition source. |
| P251 | Pressurized container: Do not pierce or burn, even after use. |
| P260 | Do not breathe spray. |
| P264 | Wash contaminated skin thoroughly after handling. |

| | |
|---|---|
| P270 | Do not eat, drink or smoke when using this product. |
| P281 | Use personal protective equipment as required. |
| Precautionary statement(s): Response | |
| P301+P310 | IF SWALLOWED: Immediately call a POISON CENTER or doctor. |
| P308+P313 | IF exposed or concerned: Get medical advice. |
| P314 | Get medical advice if you feel unwell. |
| P331 | Do not induce vomiting. |
| Precautionary statement(s): Storage | |
| P405 | Store locked up. |
| P410+P412 | Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F |
| Precautionary statement(s): Disposal | |
| P501 | Dispose of contents and container in accordance with local regulations. |

SECTION 3 – COMPOSITION AND INFORMATION ON INGREDIENTS

| Ingredients: | CAS Number: | Proportion (%w/w): |
|---|-------------|--------------------|
| Propane | 74-98-6 | 30-60 |
| Butane | 106-97-8 | 30-60 |
| Dichloromethane | 75-09-2 | 30-60 |
| Solvent naphtha (petroleum), medium aliphatic | 64742-88-7 | 10-30 |
| Solvent naphtha (petroleum), light aromatic | 64742-95-6 | 0-10 |
| Ingredients determined to be non-hazardous at the concentrations used | various | balance |

SECTION 4 – FIRST AID MEASURES

| | |
|-----------------------------|--|
| Inhalation | Remove person to fresh air away from exposure. Remove contaminated clothing and loosen remaining clothing. Allow patient to assume most comfortable position and keep warm. Keep at rest until fully recovered. Obtain medical attention if symptoms occur. |
| Skin contact | If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with soap and running water. |
| Eye contact | Immediately irrigate with copious quantities of water for 15 minutes. Eyelids to be held open. Remove clothing if contaminated and wash skin. Urgently seek medical assistance. |
| Ingestion | Do NOT induce vomiting. Do NOT attempt to give anything by mouth to an unconscious person. Rinse mouth thoroughly with water. Give water to drink. Where vomiting occurs naturally have affected person place head below hip level in order to reduce risk of aspiration. Seek medical advice (e.g. doctor). |
| Advice to Doctor | Treat symptomatically. |
| First Aid Facilities | Eye wash station. Normal washroom facilities. |

SECTION 5 – FIRE FIGHTING MEASURES

| | |
|-----------------------------------|--|
| Fire and Explosion Hazards | Contents under pressure - cans can explode in a fire. This product is extremely flammable. Keep containers and fire-exposed surfaces cool with water spray. Shut off any leak if safe to do so and remove sources of re-ignition. Vapour/air mixtures may ignite explosively. Flashback along the vapour trail may occur. Runoff to sewer may create fire or explosion hazard. |
| Extinguishing Media | Carbon dioxide, foam, dry powder, water fog or water mist. |

| | |
|----------------------|---|
| Fire Fighting | Fire fighters should wear full protective clothing and self-contained breathing apparatus (SCBA) operated in positive pressure mode. In case of fire the product may be violently or explosively reactive. Use water spray to disperse vapours. This product should be prevented from entering drains and watercourses. |
| Flash Point | < -104°C (due to propellant) |

SECTION 6 – ACCIDENTAL RELEASE MEASURES

| | |
|-----------------------------|--|
| Emergency Procedures | <p>HAZCHEM code : 2YE</p> <p>2 = use water fog- in the absence of fog, a fine spray may be used to fight fires.</p> <p>Y = Yes – risk of violent reaction, recommend breathing apparatus for fire only, contain.</p> <ul style="list-style-type: none"> • Shut off engine and electrical equipment off. • No smoking or naked lights within 50 metres. • Move people from immediate area; keep upwind. • Send messenger to notify fire brigade and police. • Tell them location, material quantity, UN number and emergency contact. Indicate condition of vehicle and damage or injuries observed. • Warn other traffic. <p>E = Consider evacuation.</p> |
| Occupational Release | <p>Extinguish or remove all sources of ignition and stop leak if safe to do so. Wear appropriate personal protective equipment and clothing to prevent exposure. Evacuate all unprotected personnel. Water spray or fog may be used to disperse/absorb vapour if any. Place inert, Non combustible absorbent material onto spillage. If safe, damaged cans should be placed in a container outdoors, away from ignition sources, until pressure has dissipated. Undamaged cans should be gathered and stowed safely. Collect residues and seal in labelled drums for disposal. If contamination of sewers or waterways occurs inform the local water and waste management authorities in accordance with local regulations. Dispose of waste according to applicable local and national regulations.</p> |

SECTION 7 – HANDLING AND STORAGE

| | |
|-----------------|---|
| Handling | <p>EXTREMELY FLAMMABLE. VAPOUR OR GAS REDUCES OXYGEN FOR BREATHING. IN CONFINED SPACES MAY CAUSE ASPHYXIATION.</p> <p>Wear appropriate personal protective equipment and clothing to prevent exposure. Handle and use the material in a well- ventilated area, away from sparks, flames and other ignition sources. DO NOT store or use in confined spaces. Have emergency equipment (for fires, spills, leaks, etc.) readily available. Build up of mists or vapours in the atmosphere must be prevented. Do NOT cut or heat containers as they may contain hazardous residues. Do not smoke. Flameproof equipment is necessary in areas where the product is being used. Take precautionary measures against static discharges. Earth or bond all equipment. Do not empty into drains. Ensure a high level of personal hygiene is maintained when using this product, that is, always wash hands before eating, drinking, smoking or using the toilet facilities. Avoid exposure. Do not handle until all safety precautions have been read and understood.</p> <p>Avoid exposure. Do not handle until all safety precautions have been read and understood.</p> |
| Storage | <p>Avoid all sources of ignition – (heat, sparks, static electricity, open flame). Use flameproof equipment and fittings to prevent flammability risk. Store in a well-ventilated area. Store in a cool, dry place and out of direct sunlight. Store away from incompatible substances i.e. strong oxidizing agents, acids or bases. Keep containers closed at all times – check regularly for leaks.</p> |

SECTION 8 – EXPOSURE CONTROLS AND PERSONAL PROTECTION

| | |
|---|--|
| Exposure Limits | <p>National Occupational Exposure Limits, as published by Safe Work Australia:</p> <p>Time-weighted Average (TWA): None established for product. For ingredients:</p> <ul style="list-style-type: none"> • Butane : 800 ppm, 1900 mg/m³ • Dichloromethane : 50 ppm, 174 mg/m³ (Notice: Sk, Carcinogen Category 3) • Oil mist, refined mineral : 5 mg/m³ <p>Short Term Exposure Limit (STEL): None established for product. For ingredients:</p> <ul style="list-style-type: none"> • None allocated |
| Biological Limit Values | <p>Name: Dichloromethane</p> <ul style="list-style-type: none"> • Determinant: Dichloromethane in urine Value: 0.3 mg/L • Sampling time: End of shift • NOTATION: Sq |
| Ventilation | <p>Use only in a well-ventilated area. Ensure airflow, where this product is used, is directed away from the operators. Ensure ventilation is adequate to maintain air concentrations below exposure standards. If this is not possible, use appropriate personal protective equipment (meeting the requirements of AS/NZS 1715 and AS/NZS 1716).</p> |
| Personal Protective Equipment | <p>Use good occupational work practice. The use of protective clothing and equipment depends upon the degree and nature of exposure. The following protective equipment should be available;</p> |
| Eye Protection  | <p>Safety glasses, chemical goggles or face shield should be used for handling concentrate in quantity, cleaning up spills, decanting, etc. Eye protection devices should conform to relevant regulations. Eye protection should conform with Australian/New Zealand Standard AS/NZS 1337 - Eye Protectors for Industrial Applications.</p> |
| Hand Protection  | <p>Wear gloves of impervious material such as nitrile – to handle in quantity, clean up spills, decanting, etc. Final choice of appropriate gloves will vary according to individual circumstances. i.e. methods of handling or according to risk assessments undertaken. Occupational protective gloves should conform to relevant regulations. Reference should be made to AS/NZS 2161.1: Occupational protective gloves - Selection, use and maintenance.</p> |
| Body Protection  | <p>Suitable protective workwear, e.g. rubber or plastic apron, sleeves, boots and cotton overalls buttoned at neck and wrist are recommended. Chemical resistant apron is recommended where large quantities are handled.</p> |
| Respirator  | <p>No respirator should be required under normal conditions of use in well-ventilated areas (outdoors) provided air concentrations are below exposure standards. If engineering controls are not effective in controlling airborne exposure then respiratory protective equipment should be used suitable for protecting against airborne contaminants. Final choice of appropriate breathing protection is dependant upon actual airborne concentrations and the type of breathing protection required will vary according to individual circumstances. Expert advice may be required to make this decision. Reference should be made to Australian Standards AS/NZS 1715, Selection, Use and maintenance of Respiratory Protective Devices; and AS/NZS 1716, Respiratory Protective Devices. If the exposure limit is exceeded briefly, a full facepiece respirator with an organic vapour cartridge may be worn. For short elevated exposures, eg, spillages:- Appropriate organic vapour cartridge respirator as per the requirements of AS/NZS 1715 and AS/NZS 1716 (Respiratory protective devices). For emergencies or instances where the exposure levels are not known, use a full-face piece positive-pressure, air-supplied respirator. Exposure Limit by more than ten times, air supplied apparatus should be used.</p> |

Other Information

Propane and Butane are asphyxiant gases which when present in an atmosphere in high concentration, lead to reduction of oxygen concentration by displacement or dilution. It is not appropriate to recommend an exposure standard for each simple asphyxiant, rather it should be required that a sufficient oxygen concentration be maintained.

SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES

| | | | |
|-------------------------|----------------------------------|-------------------------|---------------------------|
| Physical State | Aerosol | Colour | Tan |
| Odour | Not available | Specific Gravity | Approx. 0.74 @ 25 °C |
| Boiling Point | Not available | Flammability | Flammable aerosol |
| Vapour Pressure | Not available | Vapour Density | Not available |
| Flash Point | -104°C (Closed cup) (propellant) | Flammable Limits | 2.2% - 10.0% (propellant) |
| Water Solubility | Insoluble | pH | Not available |

SECTION 10 – STABILITY AND REACTIVITY

| | |
|--------------------------------|--|
| Reactivity | Stable at normal temperatures and pressure. Reacts violently with acids. Corrosive to metals. |
| Conditions to Avoid | Sources of heat and ignition, open flames. Closed containers may rupture when exposed to heat greater than 50°C. |
| Incompatibilities | Strong oxidising agents. |
| Hazardous Decomposition | Product can decompose on combustion to form Carbon Monoxide, Carbon Dioxide, and other possibly toxic gases and vapours. |

SECTION 11 – TOXICOLOGICAL INFORMATION

POTENTIAL HEALTH EFFECTS

No adverse health effects expected if the product is handled in accordance with this Safety Data Sheet and the product label. Symptoms or effects that may arise if the product is mishandled and overexposure occurs are:

| | |
|---------------------|--|
| Inhalation | Inhalation of product vapours may be irritating to the respiratory system. Symptoms include sneezing, coughing, wheezing, shortness of breath, headache, dizziness, drowsiness, nausea and vomiting. Propane and Butane are asphyxiant gases which when present in an atmosphere in high concentration, leads to reduction of oxygen concentration by displacement or dilution. Symptoms include decreased visual acuity, decreased coordination and judgment, headache, dizziness, confusion, drowsiness, fatigue, shortness of breath, muscular weakness, convulsions, unconsciousness, coma and eventually death |
| Skin contact | May be irritating to skin. The symptoms may include redness, itching and swelling. Prolonged or repeated skin contact may lead to dermatitis. |
| Eye contact | May be irritating to eyes. The symptoms may include redness, itching and tearing. |
| Ingestion | Unlikely due to form of product. If ingestion occurs, may cause lung damage if swallowed. Subsequent to ingestion or vomiting, small amounts of liquid aspirated into the respiratory system may cause severe pulmonary injury that may lead to death. May also cause irritation to the gastrointestinal system. Symptoms may include nausea, vomiting, diarrhoea and abdominal pain.. |
| Other | This material contains asphyxiant gas, which when present in an atmosphere in high concentrations, lead to a reduction of oxygen concentration by displacement or dilution. It is not appropriate to recommend an exposure standard for each simple asphyxiant, rather it should be required that a sufficient oxygen concentration be maintained. The minimum oxygen content in air should be 19.5 per cent by volume under normal atmospheric pressure. Unconsciousness and death can rapidly ensue in an environment, which is deficient in oxygen. Dichloromethane may cause central nervous system depression. Inebriation and excitation, passing into narcosis, is a typical reaction. In severe acute exposures there is a danger of death from respiratory failure or cardiac arrest. Overexposure by skin absorption or inhalation may injure the liver, kidneys and bladder. |

| | |
|----------------------------------|---|
| Carcinogen Status | May cause cancer. Classified as a Known or presumed human carcinogen. Mineral oils, untreated or mildly treated is listed as a Group 1: Carcinogenic to humans according to International Agency for Research on Cancer (IARC). Dichloromethane is listed as a Group 2A: Probably carcinogenic to humans according to International Agency for Research on Cancer (IARC). |
| Respiratory Sensitisation | Not expected to be a respiratory sensitizer. |
| Skin Sensitisation | Not expected to be a skin sensitizer. |
| Germ cell mutagenicity | May cause genetic defects. Classified as known or presumed to induce heritable mutations. |
| Reproductive Toxicity | Not considered to be toxic to reproduction. |
| STOT-single exposure | Not expected to cause toxicity to a specific target organ. |
| STOT-repeated exposure | Causes damage to organs (central nervous system) through prolonged or repeated exposure. |
| Aspiration Hazard | May be fatal if swallowed and enters airways. |

SECTION 12 – ECOLOGICAL INFORMATION

| | |
|--------------------------------------|---|
| Eco-toxicity Product | No ecological data is available for this material. |
| Persistence and degradability | No information. |
| Bio accumulative potential | No bioaccumulation is expected. |
| Mobility in soil | Due to its physicochemical characteristics, highly mobile in the environment and will partition to the aquatic compartment. |
| Other adverse effects | Not available |
| Environmental Protection | Do not discharge this material into waterways. |

SECTION 13 – DISPOSAL CONSIDERATIONS

| | |
|--|---|
| | Dispose of waste according to applicable local and national regulations. Do not allow into drains or watercourses or dispose of where ground or surface waters may be affected. Wastes including emptied containers are controlled wastes and should be disposed of in accordance with all applicable local and national regulations. |
|--|---|

SECTION 14 – TRANSPORT INFORMATION

| | |
|-----------------------------|---|
| ADG | Classified as Dangerous Goods by the criteria of the "Australian Code for the Transport of Dangerous Goods by Road & Rail". |
| Marine Pollutant | No |
| Land Transport (ADG) | |
| UN Number | 1950 |
| Proper Shipping Name | AEROSOL, FLAMMABLE N.O.S. |
| Class | 2.1 |
| HAZCHEM Code | 2YE |
| Packing Group | None allocated |
| ERG | 49 |
| Special Provisions | SP63, 190, 229, 277. |

| | |
|--------------------|---|
| Segregation | <p>This material is classified as Dangerous Goods Division 2.1 Flammable Gases Division 2.1 Dangerous Goods are incompatible in a placard load with any of the following:</p> <ul style="list-style-type: none"> - Class 1: Explosives - Division 2.2 Non-flammable, Non toxic gas that have a subsidiary risk 5.1 except when all are packed in cylinders or pressure drums not exceeding 500L capacity. - Class 3: Flammable Liquids, if both the Division 2.1 and Class 3 dangerous goods are in tanks or other receptacles with a capacity individually exceeding 500L. - Division 4.1: Flammable Solids - Division 4.2: Spontaneously combustible substances - Division 4.3: Dangerous when wet substances - Division 5.1: Oxidising substances - Division 5.2: Organic peroxides - Class 7: Radioactive materials unless specifically exempted |
|--------------------|---|

SECTION 15 – REGULATORY INFORMATION

| | |
|---------------------------|--|
| GHS Classification | Classified as Hazardous according to the Globally Harmonised System of Classification and labelling of Chemicals (GHS) including Work, Health and Safety regulations, Australia. |
| SUSMP | This product is not classified as a Schedule Poison according to the SUSMP. |
| ADG Code | Classified as Dangerous Goods by the criteria of the "Australian Code for the Transport of Dangerous Goods by Road & Rail". |
| AICS | All ingredients present on AICS |

SECTION 16 – OTHER INFORMATION

| | |
|-----------------------------------|---|
| Issue Date | June 2023 |
| Version Number | V3: regular review |
| Abbreviations and acronyms | <p>ADG Code: Australian Code for the Transport of Dangerous Goods by Road and Rail.</p> <p>AICS: Australian Inventory of Chemical Substances.</p> <p>CAS Number: Chemical Abstracts Service Registry Number.</p> <p>GHS: Globally Harmonized System of Classification and Labelling of Chemicals</p> <p>HAZCHEM: An emergency action code of numbers and letters which gives information to emergency services.</p> <p>HCIS: Hazardous Chemical Information System</p> <p>SWA: Safe Work Australia.</p> <p>SDS: Safety Data Sheet</p> <p>STEL: Short Term Exposure Limit.</p> <p>SUSMP: Standard for the Uniform Scheduling of Medicines and Poisons.</p> <p>TWA: Time Weighted Average.</p> <p>UN Number: United Nations Number.</p> |
