# Eliminate germs and bacteria with Antimicrobial Air Sanitisation Treatment.

Your RV is a breeding ground for germs and bacteria specifically in air-conditioning and heating systems. Once turned on, airborne bacteria and allergens can get blown straight into your face.

Studies show that vehicles' are one of the unhealthiest environments in exposing you and your family to many different strains of bacterial viruses.

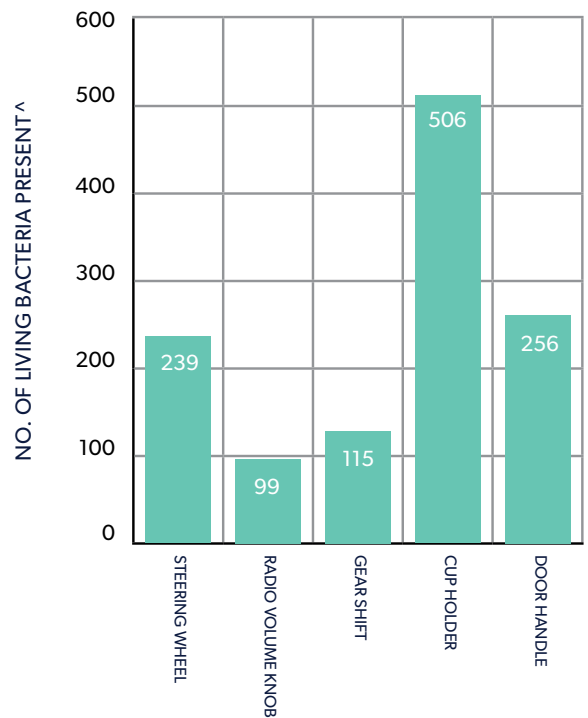

**Antimicrobial** Air Sanitisation Treatment is an environmentally friendly water-based solution that forms an invisible, long lasting barrier, actively protecting surfaces from build-up of organic matter including bacteria, moulds, germs and allergens.

## You can't see them but microscopic bacteria are breeding in your RV's interior.

Pollutants such as germs, bacteria, infectious disease, mould spores, mildew, viruses and pet odours ride in your RV on a daily basis.

**Antimicrobial** Air Sanitisation Treatment's provides you with a hi performance cleansing treatment to fight air and surface pollution. Works rapidly and effectively to naturally decompose vehicle odours, while thoroughly ridding your RV of infectious bacteria strains.

One treatment will help provide you an odour-free, germ-free and allergen-free van giving you a healthier environment.
