<b>Extinguishing Media</b>	Use appropriate fire extinguisher for surrounding environment.
<b>Fire Fighting</b>	This product is non-combustible. However, following evaporation of aqueous component under fire conditions, the non-aqueous component may decompose and/or burn producing oxides of carbon. As a water based product, if spilt on electrical equipment the product will cause short-circuits. Fire fighters should wear full protective clothing and self-contained breathing apparatus (SCBA) operated in positive pressure mode. Fight fire from safe location

**SECTION 6 – ACCIDENTAL RELEASE MEASURES**

<b>Spills</b>	Wear appropriate personal protective equipment and clothing to prevent exposure. Increase ventilation. If possible contain the spill. Place inert absorbent material onto spillage. Collect the material and place into a suitable labelled container. Do not dilute material but contain. Dispose of waste according to the applicable local and national regulations. If contamination of sewers or waterways occurs inform the local water and waste management authorities in accordance with local regulations. As a water based product, if spilt on electrical equipment the product will cause short-circuits.

**SECTION 7 – HANDLING AND STORAGE**

<b>Handling</b>	Avoid inhalation of vapours and mists, and skin or eye contact. Use only in a well ventilated area. Keep containers sealed when not in use. Prevent the build up of mists or vapours in the work atmosphere. Maintain high standards of personal hygiene i.e. Washing hands prior to eating, drinking, smoking or using toilet facilities.
<b>Storage</b>	Store in a cool, dry, well-ventilated area, out of direct sunlight. Store in suitable, labelled containers. Keep containers tightly closed. Store away from incompatible materials. Ensure that storage conditions comply with applicable local and national regulations. Protect from freezing.
<b>Storage temperatures</b>	Store at room temperature (15-25°C recommended).

**SECTION 8 – EXPOSURE CONTROLS AND PERSONAL PROTECTION**

<b>Exposure Limits</b>	National Occupational Exposure Limits, as published by Safe Work Australia: <b>Time-weighted Average (TWA):</b> <ul style="list-style-type: none"> <li>None established for product and ingredients.</li> </ul> <b>Short Term Exposure Limit (STEL):</b> <ul style="list-style-type: none"> <li>None established for product and ingredients.</li> </ul>
<b>Ventilation</b>	Use in a well-ventilated area. If mists or vapours are produced, local exhaust ventilation should be used.
<b>Personal Protective Equipment</b>	Use good occupational work practice. The use of protective clothing and equipment depends upon the degree and nature of exposure.
<b>Eye Protection</b> 	Safety glasses with side shields should be used to handle concentrate in quantity, clean up spills, decant, etc. Eye protection devices should conform to relevant regulations. Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate. Eye protection should conform with Australian/New Zealand Standard AS/NZS 1337 - Eye Protectors for Industrial Applications.
<b>Hand Protection</b> 	Wear gloves of impervious material such as butyl rubber, natural latex, neoprene, PVC, and nitrile – to handle in quantity, clean up spills, decanting, etc. The final choice of appropriate gloves will vary according to individual circumstances. Occupational protective gloves should conform to relevant regulations. Reference should be made to AS/NZS 2161.1: Occupational protective gloves - Selection, use and maintenance.
<b>Body Protection</b> 	Suitable protective workwear (e.g. apron, long sleeves/trousers, boots and cotton overalls buttoned at neck and wrist) are recommended. A chemical-resistant apron is recommended for handling large quantities.
<b>Respirator</b>	If engineering controls are ineffective in controlling airborne exposure, then an approved respirator with a replaceable mist filter should be used. Refer to relevant regulations for further information concerning respiratory protective requirements. Reference should be made to Australian Standards AS/NZS 1715, Selection, Use and Maintenance of Respiratory Protective Devices; and AS/NZS 1716, Respiratory Protective Devices, in order to make any necessary changes for individual circumstances.
