

WHERE CLARITY MEETS EXTREME DURABILITY.

This three part application provides resistance and protection to corrosion on alloy wheels, a durable deep satin tyre finish and all season protection to front and rear windscreens.

VIEWTEC

SUPERIOR GLASS, TYRE AND WHEEL COATINGS

WHERE CLARITY MEETS EXTREME DURABILITY.

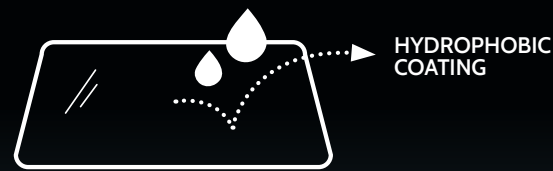

WINDSCREEN COATING

FORMULATED TO IMPROVE CLARITY AND VISIBILITY THROUGH THE FRONT WINDSCREEN.

HOW DOES WINDSCREEN COATING WORK?

ViewTec's superior windscreen coating is formulated to improve clarity and visibility through the front windscreen.

An advanced ceramic formulation, creates a highly durable protective layer between glass and the elements.

A 5-year windscreen repair or replacement warranty* applies.

CERAMIC WHEEL PROTECTION

EXCEPTIONAL DEFENCE AGAINST ROAD GRIME AND DEBRIS.

A scientific high-performance formula combining Silicon Carbide (SiC) and Silicon Dioxide (SiO₂), delivers extreme durability, helping to lock in a factory finish.

- Protects against UV damage and fading.
- Reduces reliance on harsh cleaning chemicals. In most cases soapy water is enough to completely clean the wheel
- Prevents alloy wheel pitting caused by brake dust
- Applied by trained technicians

Hydrophobic properties reduce the adhesion of contaminants such as brake pad residue, road grime and dust.

HYDROPHOBIC COATING

TYRE PROTECTION

LONG-LASTING DEEP SATIN FINISH

An advanced polymer technology ViewTec's tyre protection coating.

- Adds a durable deep satin finish, enabling simple cleaning with soapy water
- Silicon-free formula
- Offers a flexible protective barrier against harmful UV rays
- Applied by trained technicians
